

Standard Life Investments Montréal

Sector Focus: Finance

When Standard Life Investments relocated to a renovated, three-floor, 28,000 square foot space, the investment managers sought a furniture system that would carry the same aesthetic and functionality from the open plan to the private office. The Company worked with firm, lemay associés, to find a system that was classic yet matched the modern aesthetic of the new space. AutoStrada™ elegantly and seamlessly carries the same performance throughout the firm's different work settings—from open plan administrative workstations and trading desks to the enclosed executive private offices and meeting rooms. AutoStrada™

workstations (cover) create clean, crisp lines in the investment firm's open office space. Clear add-up glass panels provide privacy and help block out noise. AutoStrada™ private office (left) integrates freestanding and wall-attached storage. This office features overhead with glass Block Matrix sliding doors. Calibre files with AutoStrada™ tops and AutoStrada™ Freestanding Cabinet units in wood finishes (top right) add warmth and delineate space in the open plan. For meeting rooms (bottom right), matching White Oak AutoStrada™ conference tables are stylish and functional. Sustainable Life® seating is featured throughout.
